# DEDICATION.

Dear Dr. Walshe,

Long years have passed since your Lectures on the Theory and Practice of Medicine aroused in the minds of many of your pupils a desire to follow (however feebly) in your footsteps, and to leave their impress upon succeeding generations. Nor has this aspiration been altogether fruitless; for some of those who, as your admiring hearers, sat with me, are now holding positions of the highest importance.

This book, which you have honoured with your approval, is my own contribution to the general stock of knowledge.

For forty years, abroad and at home, I have steadily laboured at the Medical Digest. During the early stages of the work I received much sympathy and encouragement from our mutual friend, the late Dr. E. A. Parkes. Now that it has taken a place in the literature of the profession, I accept your permission to dedicate to you this, the First Appendix, with the deepest feelings of respect and gratitude.

RICHD. NEALE, M.D. Lond.

Boundary Road,
S. Hampstead, N.W.
*June,* 1886.

# PREFACE.

THIS, the First Appendix of the MEDICAL DIGEST, has, in accordance with numerous requests, appeared a year sooner than was originally intended. The vast amount of fresh material accumulated during the last four years, will, it is hoped, justify the departure from the original plan. Each Section corresponds with the same numbered Section in the edition of 1882. Where there is any addition to a subject mentioned in that edition the word *Contd.* follows, thus :—

**713.**

PERTUSSIS *Contd.*
PATHOLOGY *Contd.*
— ENLARGED GLANDS *Contd.*
— HABIT MEMORY.

whereas, if *Contd.* do not follow, then the subject treated of is entirely new, as HABIT MEMORY.

The "Asclepiad" has been added to the Periodicals included in the DIGEST.

A. indicating "Asclepiad."
PS., as well as M. C., "Medical Press and Circular."

To make proper use of the Appendix, the Index of Edition of 1882 must be first consulted for any subject, and the corresponding Section referred to in the Appendix to see if fresh matter has been added. If the Index of 1882 does not refer to the subject sought for, then turn to Appendix Index, in which new subjects are alone noted.

The Second, and probably the Third Appendix, will be incorporated with this, the First, in order to facilitate reference.

# CORRIGENDA FOR EDITION 1882.

As future copies of the Edition of 1882 will be produced only from stereotype, and not be reprinted, it is desirable that all errors should be corrected; therefore the following formidable list is given, which unhappily escaped notice as the work passed through the press. To form this has necessitated a careful comparison of the text with the original manuscript. The Appendix itself has been subjected to so careful a revision, that the possibility of any such list being necessary, on a future occasion, has been avoided.
